Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary**Application No.**

10/523,176

Applicant(s)

MATSUMOTO, DAISUKE

Examiner

Julian W. Woo

Art Unit

3773

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 June 2010.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-8, 10, 11, 14-17 and 19 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-5, 7, 8, 10, 11, 14-17 and 19 is/are rejected.
- 7) ☒ Claim(s) 6 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 28 January 2005 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☒ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date 5/27/10
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 14, 2010 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5, 7-14, 16, 17 and 19-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Duchon et al. (5,879,311). Duchon discloses, at least in the figures and in col. 6, line 15 to col. 8, line 60; col. 9, lines 26-45; and col. 10, lines 9-30; a lancet unit or a lancet removal tool including a case (12) provided separately from and temporarily attached to a housing (22) of a lancing apparatus at the time of supplying a lancet to and removing the lancet from the lancing apparatus, and a support member (102, 130, and 100 combined) provided in the case, where the lancet is supplied from the support member to

the movable member (18) when the case is attached to the housing in the first state, where the support member includes an engagement means (130, see figs. 13-16) provided on the support member within the case for removing the lancet from the lancing apparatus—the engagement means pulling the lancet from the movable member out of the housing when the case is detached from the housing, where the engagement means is inserted into the housing through the opening for engagements with the engagement surface of the lance4t when the case is attached to the housing of the lancing apparatus in a second state (see fig. 3H), where the lancet includes a needle (154) and a body (152), where the body has an outer circumferential surface formed with a projection (156, 158) or stepped portion (surrounding 156 or 158), where the engagement means (130) includes at least one projection (133) extending in direction of the needle and formed with a pawl, where the engagement means includes a plurality of projections (140) that can clip the lancet, where the stepped portion of the body comprises a flange (adjacent to element 158--see fig. 11), where the support member includes a tubular portion (102), where the lancet unit includes an analytical part (164) and additional engagement means (162) each with an additional engagement projection, where the analytical part is removably supported by the support member, where the analytical part has an engagement surface oriented toward a rear side of the housing, where the engagement means and the additional engagement means are arranged to enter the housing together, where the case includes a partition wall (118, see fig. 3A); where a cap (S), the lancet, and the analytical part are arranged in a first chamber and the

Art Unit: 3773

engagement means and additional engagement means are arranged in a second chamber, where the lancing apparatus includes a biasing means (90), a latching means (84), a latch releasing means (46, and a stopper (88, see col. 9, lines 26-39); where the stopper is capable of being positioned in a movement path of the movable member (18), where the housing is provided with a holding portion (near the front opening or near the rear) for removably holding an analytical part (164 or 52), where the support member includes a cap (102) for covering the needle (at least the sides of the needle) and removably supporting the lancet, where the lancet unit includes a boundary portion (spring 132) between the body and the cap (102), the spring being more liable to receive stress than other portions of the body and the cap; and wherein when the case is slid along and fitted to the front end of the housing with an analytical part (24 with respect to claim 19), an additional engagement means (164 with respect to claim 19) in the case enters the housing and engages an engagement surface (58) of the analytical part.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
 2. Ascertaining the differences between the prior art and the claims at issue.
 3. Resolving the level of ordinary skill in the pertinent art.
 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
5. Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Duchon et al. (5,879,311) in view of Mitchen (5,014,718). Duchon et al. disclose the invention substantially as claimed, but do not disclose a lid for hermetically closing the first chamber. Mitchen teaches, at least in figures 1 and 2 and col. 2, lines 31-54; a lancing unit with a lid (11) for closing a first chamber (at 15 and 20). It would have been obvious to one having ordinary skill in the art at the time the invention was made, in view of Mitchen, to modify the lancing unit of Duchon et al., so that it includes a lid. Such a lid would protect at least the internal parts of the lancing unit from contaminants prior to use of the lancing unit.

Allowable Subject Matter

6. Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
7. The following is a statement of reasons for the indication of allowable subject matter: None of the prior art of record, alone or in combination, discloses a lancet unit including, inter alia, a lancet and a support member with a plurality

Art Unit: 3773

of engagement projections, where the lancet includes a needle and a body with a stepped portion, the stepped portion including a flange, wherein, when the engagement projections are inserted into a housing, each of the engagement projections resiliently deforms due to contact with the stepped portion, so that pawls of the engagement projections pass over the stepped portion.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Response to Amendment

8. Applicant's arguments regarding the rejections based on the Duchon et al. have been fully considered but they are not persuasive. Applicant argues that Duchon et al. do not disclose "a separate device for supplying a lancet to and removing the lancet from a lancet apparatus which includes a housing having a front end formed with an opening and a movable member provided in the housing." The Examiner respectfully disagrees. As shown in the rejection above, Duchon et al. disclose, as claimed, a separate case, among other parts, that is directed to a lancet unit or removal tool. In other words, the introductory statements of intended use ("for supplying a lancet to and removing the lancet from a lancing apparatus which includes a housing having a front end formed with an opening and a movable member provided in the housing reciprocally moveably, the housing and the movable member forming no part of the lancet unit" and "for removing a lancet from a movable member of a lancing apparatus, the lancing apparatus including a housing which has a front end formed with an

Art Unit: 3773

opening and in which the movable member is arranged reciprocally movable") have been carefully considered but deemed not to impose any structural limitations on the claims patentably distinguishable over the device of Duchon et al., which is capable of being used as claimed if one desires to do so. Structurally, the invention as claimed and the device of Duchon et al. are the same. Moreover, Duchon et al. indeed disclose a housing (22) and a movable member (18), deemed to be parts of a lancing apparatus, where the attachment of the case (12) to the separate housing is deemed a temporary attachment (i.e., the device Duchon et al. can be assembled as shown and soon disassembled).

Conclusion

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Julian W. Woo whose telephone number is (571) 272-4707. The examiner can normally be reached Mon.-Fri., 8:00 AM to 3:00 PM Eastern Time, alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jackie Ho can be reached on (571) 272-4696. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through

Art Unit: 3773

Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
